

MOVE YOUR MONEY DAY

Friday 2nd December

On National Move Your Money Day people all over the UK will be moving their money out of high street banks into their local credit union.

Large sections of the population, particularly the most vulnerable are being forced to pay for the reckless mistakes of the banks, either through government cuts or recession related redundancies. Meanwhile the banks continue to perpetuate a culture of high risk and pay large bonuses to their top employees, in some cases with taxpayers money.

Credit Unions are owned and controlled by their members and exist to provide a service to the local community, not to create profit for shareholders, or pay fat bonuses.

Vote with your wallet and move your money on
Fri 2nd Dec.
